Campaign is decent, would have been a lot better if they had made it co-op. Raid mode is pretty great, but you might have a hard time finding anyone to play with online. 7.5/10. just don't buy this.. Videoball... Sorry, I need to clear my throat for this one...

VIDEOBALL is an air hockey-Asteroids-Crossfire(the board game) mashup sports game where you shoot projectiles at the ball(s) and can use them to stun other players (including your teammates). Games can be 1v1, 2v2, or 3v3 if you're feeling up for one VIDEOBALL match you'll never forget. The controls remind me of Asteroids except more floaty, but they're fine. I also appreciate the intuitiveness for just using the control stick and any one button to navigate though menus, though it can get somewhat confusing at times. It's not a horrible thing though. If you're a shut-in like me, you'll be glad that there's AIs, each with their own behaviors. You could have an AI for scoring, an AI for defending, and you, for.. Whatever you want to do, I guess. Even with the large amount of customization available in exhibition matches, there's also an arcade mode where you (and a friend (assuming you have any after kicking their♥♥♥♥♥in VIDEOBALL)) can play against predetermined AIs in several different arenas. There's also an online mode which I haven't tried yet (will update this review when I actually find someone). tried and it's actually better than I expected with all the stuff that can be onscreen. Sure, there were a few hiccups here and there, but I played a 3v3 with little to no lag and that's awesome.

So yeah, that's pretty much Video- VIDEOBALL. Now if you'll excuse me, I need to go relax my throat again... After one more game of VIDEOBALL.

Now my throat is dead. Meh.. Qbeh-1 is one of those games that really make you appreciate good puzzle game design. Unfortunately, this is because "You don't know what you got 'til it's gone."

I quit halfway through the second world, so I don't know what kind of other cubes/mechanics get introduced later on, but the beginning gave me a bad taste. The "puzzles" in world 1 are nothing but picking up cubes and placing them in dedicated zones to reach more cubes to increase your supply to repeat ad nauseum. It gets old quick, especially with the great many instakill pits that respawn you at FAR-too-infrequent checkpoints, forcing you to repeat the earlier tediousness. The puzzle design might be redeemable later on with more mechanics, but the QoL here is too low for me to recommend.. Great Multiplayer Game

Grab 3 other friends and give it a go.. Great art, and the story has me hooked. The price is fair for the amount of content in the first part, but I would rather pay more for larger chunks of story. And I WOULD love to pay more for more parts of this when they come out.. Please please add a way to skip levels.

There are things I like about this game and it does a lot intelligently.

But oh man its hard (also I'm bad at platformers); it feels like its goal is to help people get over anxiety but to be honest this game just adds more stress.

The maps are all designed pretty well (with exception to that race map later in the game that is just frustrating and pointless); but it's hindered quite a bit by clunky, often broken, controls. There are innumerable times when I should've jumped over something but the game haphazardly decided that I didn't and it got me killed.. This Nightmare Costume looks guud on Mikoto

Another great map from ViewApp once again

Pros:

AI Bendy Is Now drivable

New Bus

Line 23A

New station 2006

Cons:

No Depot

i think this addon is great. Works great, support is great. Very low impact with good functional ui and options. Invaluably useful.. Cheap, competent, reasonably fun.

3d platforming in a cohesive if forgettable world.

I wish that I could run.

<https://youtu.be/V9yTt0b5JkYw>. I paid 60 dollars for a fighting game, and I have not been submitted to such a ridiculous grind since my old days of WOW. Great game with incredible large scale battles, or small 10 on 10 fights for a small outpost. Great weapon diversity and abilities which and unique dynamics to each fight. Would highly recommend everyone to try it for free.. Played this game before excellent game

[just this time i'm unable to play it as it won't run. I didnt get my first hokage and and 3rd hokage skin. Fast-paced hardcore platformer, extremely fun! Vibrant colors and a killer soundtrack. 10V10. Wife and I played through the first room. Was enjoyable. Would like to play more rooms!](#)

[As other reviews mention, dropping things due to collisions, things that may disappear. It can be avoided if you play carefully, but its something that should be fixed in the future. It is by the way the exact same problems we had with the other escape room game called Abode \(also a cool game\).](#)

[Besides mentioned bugs, all I am left with is a feeling of wanting more, which is a good thing.](#)

[At 0.99\u20ac its worth it even for the one room.. So many \u2665\u2665\u2665\u2665ing bullets I almost had a brain aneurysm.](#)
